Showcasing council's service delivery projects and sector departments' programs since 2011 to 2016

Foreword by the Mayor

You are holding in your hand a brief and concise document containing projects done by the municipality from 2011 to 2016. Service delivery has never been easy more so in these our difficult times. I must admit that ours has not been an easy task to perform. We have scooped a number of accolades along the way which I will briefly relate here.

I do so in the spirit of openness and frankness about our achievements, successes and challenges. For the past five years or so we have tabled and adopted budgets and implemented projects on behalf of our communities. The most recent budget tabled towards the fall of May this year is the penultimate Budget Speech of the term of this council (2011-2016).

Let me take this opportunity and thank the African National Congress (ANC) for the exposure and experience of entrusting us with the responsibility to lead local government in our area. We appreciate it dearly.

We are finishing this term imbued with invaluable experience of having worked excellently with our communities across Senqu Municipality. Let me also highlight that the times we are living in are characterized by many somber features across the continuum. Wherever you lay your eyes you will see scores of dissatisfaction from residents owing to low growth in respect of the economy, high unemployment, extreme inequality and hurtful fractures in our country- these are unacceptable to all of us.

Our council has adopted and implemented budgets that seek to respond to these pressing features plaguing our hard earned democracy hence we need to take stock of our achievements over the past few years and responds to the challenges that lie ahead. Despite the challenges that the Municipality has experienced, Senqu has performed exceptionally and recently received its second clean audit opinion from the Auditor-General. There is a positive linkage between audit outcome and service delivery outcomes, Senqu has improved the livelihoods of its people especially the rural communities by delivering better services. I must thank my fellow Councilors and all the staff involved for

this achievement. Let me quote my own words in May 2011, "As I begin my term of office I would like to begin by thanking our out-going Mayor and his team for laying a solid foundation and setting such high standards for us as the new team. We are so privileged to have been left with Mr Dumzela's strong legacy. I wish to assure both the community and the administrative arm of Senqu Municipality of my Council's absolute commitment to striving towards achieving better and stronger accolades in good governance. Very close to my heart is ensuring economic upliftment for our area, especially for the previously marginalized which are women, youth and disabled. We have achieved so much in our 20 years of democracy and look forward to achieving so much more as we facilitate ways to ensure peace, stability, job creation, an improved and strong economy, and a firm foundation for better and even faster progress, especially within our rural areas. We look forward to working with the Municipal Manager, staff and the community at large and thank you in anticipation for your support and vote of confidence".

When I look back at the goals we set for ourselves to achieve as this team, we have far surpassed our targets. We have made a positive difference in the lives of the youth of our municipality. Notwithstanding the difficult times during the Sterkspruit uprisings in 2012, we managed to weather the storms and emerged stronger and bolder. True leadership is not tested during the best of times but during the worst of times. In this respect, we demonstrated superior leadership.

Senqu Municipality has been elected as one of only a few pilot municipalities to test the implementation of the new Municipal Standard Chart of Accounts (mSCOA) being rolled out by National Treasury. The main purpose of mSCOA is to provide budget transparency and it is a tool that encourages proper planning within the municipality. Good governance is a result of the solid political support and strong management involved in the implementation of this business reform. To date Senqu Municipality is rated the best municipality in complying with mSCOA regulations and compared to Nelson Mandela Metropolitan and the latter is

requesting to bring their team to learn about mSCOA processes from Senqu Municipality.

Notwithstanding these successes, Senqu is faced with a challenge of under spending in the Municipal Infrastructure Grant (MIG). Better planning is required in this regard to ensure that the projects that appeal primary to the community and politicians be implemented as planned as the municipality has gone away from lacking resources.

It is amazing how fast years come and go. But I'm pleased that we have reached the targets we set targets. In 2014, Senqu Municipality was the biggest winner and won five (5) Vuna awards. The five categories the municipality won were on service delivery, financial management and viability, good governance and public participation. The municipality also won award in Somerset East from the Office of the Auditor-General in 2015.

The Freedom Charter is our vision of the type of local government we seek to build. It is our lodestar. The effective functioning of a municipality begins with its political leadership. In this regard we have done our best. We are at the tail-end of our term.

In the build-up to the 2016 local government elections that will be held on 03rd August 2016, municipalities are encouraged to act towards ensuring financial sustainability. Now, more than ever before, it is paramount for sound municipal decision-making so that long-term sustainability of municipal finances and service delivery is achieved beyond the election period.

In closing I want to thank the residents of Senqu for the trust they have given this council. The priorities set in the beginning of our term have been carefully brought to you in this short service delivery document. We hope that this will revive your memory as you witness what this council has done for you.

Thank you.

SENQU MUNICIPALITY COUNCIL

YEAR 2011 TO 2016

Cllr N.Y. Mtyali (Mayor)

LED unit hands over equipment to support SMMEs

Main picture and pictures below: A display depicting some of the LED Project Equipment that were handed over on the day.

The LED Unit of the municipality donated essential equipment for projects and SME's within the various wards of Senqu. In total 21 projects were supported this financial year. The handover of the equipment was done on 19 June 2015 at the Bhunga Hall in Sterkspruit.

The recipients who are small businesses could not hold their tears as they showed their much appreciation for the benevolent deed done unto them.

The Local Economic Development information sharing day is an initiative by the LED Unit of the municipality to provide access to the business community about all the relevant information they require in order to equip themselves and their businesses. This year's LED day was held on Thursday 25th June at the Bensonville hall in Sterkspruit. The event was a great success as the business people filled out the venue to engage with the various departments and parastatal companies that were invited to do the presentations.
