HESCHEL

STERKSPRUIT

INTRODUCTION

Local government must provide waste management services, which include waste removal, storage and disposal services, as per schedule 5b of the constitution.

The National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) stipulates that -standards are required to "give effect to the right to an environment that is not harmful to health and well-being," and that this right have to be applied "*Uniformly throughout the Republic*".

At their discretion, municipalities may set local waste service standards for waste separation, compacting, management and disposal of solid waste aligned to provincial and national standards. Equitable waste collection services must be provided to all households within the jurisdiction of the municipality.

The preferred frequency of collection services to households for Senqu Local Municipality is once a week.

A more frequent service which is* daily removal is currently done for restaurant putrescible waste (organic waste that quickly decomposes).

Alternative means have been explored by the Municipality to ensure consistency and reliability of the service at is more important than the type of receptacle or collection.

The municipality has noted that disrupted waste collection services may result in waste being illegally dumped everywhere.

The provision of waste collection services improves the quality of life of the entire community and ensures a clean and more acceptable place to live and work in.

In areas where travelling distances and the resulting costs may render regular waste collection services impractical, the municipality, through by-laws, must allow for more feasible alternative ways of waste handling, such as on-site disposal

WASTE MANAGEMENT BY-LAWS

PRINCIPLES

1. Any person exercising a power in accordance with this By-Law must:
 - Seek to promote the waste management hierarchy approach as outlined in the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) and the National Waste Management Strategy, which is promoting waste avoidance and minimisation, waste reuse, recycling and recovery, waste treatment and disposal.
2. This By-Law seeks to promote sustainable development and environmental justice through fair and reasonable measures for management of waste within the Municipality's jurisdiction.
3. This By -Law promote participation of all municipal residents in the promotion of responsible citizenship by ensuring sound waste management practices within residential and industrial environments.

GENERAL DUTY OF CARE

1. Every person has a duty to manage any waste generated by his or her activities or the activities of those persons working under his or her direction in such a manner that the waste does not cause **harm to human health** or damage to the environment. In particular, the person must ensure that:
 - a) Waste generation is avoided and where such waste cannot be avoided, minimise the toxicity and amounts of waste.
 - b) Waste is reduced, reused, recycled or recovered
 - c) Where waste must be disposed of, the waste is treated and disposed in an environmentally sound manner.
 - d) The waste is managed in such a manner that it does not endanger health or the environment or cause a nuisance through noise, odour or impacts
2. Any person subject to the duty imposed in subsection (1) may be required by the Municipality or authorised official to take measures to ensure compliance with the duty.

3. The measures referred to in subsection (2), that a person may be required to undertake include-
 - a) Investigation, assessment and evaluation of the impact that their activities, the process or situation have on the environment;
 - b) Informing and educating employees about the environmental risks of their work and the manner in

CHAPTER 3

PROVISION OF WASTE SERVICES

Storage and receptacles for general waste

1. Any person or owner of premises where general waste is generated must ensure that waste is stored in a receptacle provided or approved by the Municipality.
2. Any person or owner of premises contemplated in section (1) must ensure that: -
 - a) The receptacles are stored inside the yard where applicable, away from the public area when still waiting for collection.
 - b) On the collection date scheduled by the Municipality in accordance with section 8, it should be placed outside the premises in an area accessible to the municipal officials or service providers.
 - c) Pollution and harm to the environment is prevented
 - d) Waste cannot be blown away and that the receptacle is covered or closed
 - e) Measures are in place to prevent tampering by animals
 - f) Nuisance such as odour, visual impacts and breeding of vectors do not arise.
 - g) Suitable measures are in place to prevent accidental spillage or leakage;
 - h) The receptacle is intact and not corroded or in any other way rendered until for the safe storage or transportation of waste.
 - i) That a receptacle (s) is provided by the municipality is not used for any other purpose than the storage of waste
 - j) In case where a receptacle (s) is damaged or corroded, the owner or occupier must notify the Municipality and arrange for replacement as soon as it comes to their attention,
 - k) Waste is only collected by the Municipality or authorised service provider; and
 - l) In case where an owner or occupier is not available on the day of collection, make necessary arrangement to ensure that waste is accessible for removal or collection

3. If the waste is not placed outside the premises on the collection date scheduled by the Municipality in accordance with section 8 or in an area accessible to the municipal officials or service providers, the person or owner of the premises contemplated in subsection (1) must ensure that he or she does so at the next collection date scheduled by the Municipality or he or she must dispose of such waste at a municipal disposal site.

8. COLLECTION AND TRANSPORTATION

1. The municipality shall: -
 - a) Only collect waste stored in approved receptacles;
 - b) Set collection schedule for both commercial and residential properties for reason of health, safety or environmental protection.
 - c) Collect waste outside the set schedule on request by any person and at a fixed tariff agreed to by both parties prior to collection.
 - d) Set the maximum number of quantities of waste that will be collected.
 - e) Identify waste streams which may not be collected by the Municipality or which are unsuitable for collection and where such a case exists, advise the owner of alternative.
2. Any person transporting waste within the jurisdiction of the Municipality must-
 - a) Ensure that the receptacle or vehicle or conveyance is adequate in size and design for the type of waste transported
 - b) Remove or transport the waste in a manner that would prevent any nuisance or escape of
 - c) Material.
 - d) Maintain the receptacle or vehicle or conveyance in a clean, sanitary condition at all times;
 - e) Not permit waste to become detached, leak or fall from the receptacle or vehicle or conveyance transporting it.
 - f) Ensure that waste is transported or deposited at a waste transfer station, recycling facility and /or disposal facility licensed to accept such waste.
 - g) Ensure that the vehicle is not used for other purposes whilst transporting waste,
 - h) Apply to the Municipality to register as a transporter of waste in accordance with the requirements set out by the Municipality and adhere to all the conditions attached to the registration

REFUSE COLLECTION TARRIFS

The solid waste tariff strategy will primarily be implemented by local and district municipalities with some support and oversight from national and provincial government.

Since municipal tariff setting remains a local government function the role of national and provincial government is to provide guidance and support to local authorities and to regulate service delivery where required under such legislation as the Municipal Services Act.

Provincial government must also oversee the effective performance by municipalities of their functions of cleansing and solid waste management.

The solid waste tariff strategy forms part of the National Waste Management Strategy and will be implemented alongside other elements of the NWMS.

The development of integrated waste management plans (IWMPs), as outlined in the NWMS, will require municipalities to evaluate their current MSW services and to plan for future service delivery from a social, technical and financial perspective.

The setting of tariffs for MSW services is an integral part of the financial component of the IWMPs. The three key documents for the setting of MSW tariffs, which will be made available to municipalities, are:

REFUSE REMOVAL TARIFFS & CHARGES 2022/23

Increase approximately 6%				
All tariffs exclude VAT				
Standard interest rate prime + 1% would be charged on all late payments				
Tariffs are applicable throughout SENQU municipality unless indicated otherwise				
	2012/2013	2018/2019	Tariff 2021/2022 " R "	Tariff 2022/2023 " R "
			EXCL VAT	EXCL VAT
Domestic Consumers (per month for one removal per week)			160,27	169,89
Additional removal (per load or part thereof)			160,27	169,89
Commercial Consumers (per month for two removals per week)			343,01	363,59
Additional removal (per load or part thereof)			343,01	363,59
Public Service Purpose Departments (Schools, hotels, SAPS, prison, hospitals, etc) (per month for two removals per week)			2 033,82	2 155,85
Additional removal (per load or part thereof)			343,01	363,59
Garden Refuse (per load) (to be paid in advance)			343,01	363,59
Building Rubble (per load) (to be paid in advance)			594,66	630,34
Cleaning of erven			343,01	363,59
